Marlene – see Carlos’ comment below. I am attaching letters describing the requirements for the dredging special permit area around the San Jacinto Site.

Subject: RE: Question: dioxin in sediment

If this is for dredging it should be coordinated through the Corps of Engineers. We (EPA) worked out parameters for the area around the San Jacinto site and what requirement to managing and disposing of sediment materials based on contaminant levels. CASCAS

Subject: RE: Question: dioxin in sediment

Yes we can, but we don't have "regulations"

I'm also concerned that this site is soon going to the RRB and this person appears to be representing the PRP.

I would suggest pointing them to the dioxin website and the sediments guidance and tools.
Matt/Marlene, can you please work together on a response along those lines?

Subject: RE: Question: dioxin in sediment

This is best addressed by Mike and Marlene, I believe.

Subject: Question: dioxin in sediment

Hi Jennifer,

Can your office best answer this question? OLEM asked that we answer them directly. See messages below.

Here's the question

Mr. D'Amico, we have various dredge sediment testing projects near the San Jacinto Dioxin Waste Disposal Pits Superfund Site and would like to know the latest regulations related to dioxin in sediments. Can you give me some guidance or refer me to the appropriate regulations? Thanks.
